

underStanding of MarkDownLanguage

- understand the concept of Read_Me file on github
- Type of extension used for markdown language files i.e .md
- How to insert bullets, how to make Italic and Bold etc.
- What are special lines

1-Headings

How to give headings?

Heading 1 (it gives an auto line under this)

Heading 2

Heading 3``

Heading 4

###...# total no of headings are 6# underStanding of MarkDownLanguage

2- Block of words

this is the normal text and

this is a block of special text

this is an other block of words use double entre for space.

3- line breaks

this is a 40 days long python course with Hassan Afandi.

this is the line break by \

4- combine two things

block of words and heading

Heading Two

5-Face of text

Bold*italic****Bold and Italic***

or also can use these symbols

_(underScore)***Bold Italic***

+(plus sign)

6- Bullet points/lists

- Day_1
- Day-2
- Day-3
- Day-4
- Day-5
 - Day-5a
 - Day_5b
- Day-6
- Day-7

you can also use the

*** sign or + sign for making of lists**

- this is a list
- this is also a point

numbring

1. Day-1
2. Day-2
3. Day-3
 1. Day-3a
 2. Day-3b
4. Day-4
5. Day-5
 - Special Notices
 - **Note**

7- Line Breaks or Page breaks

instead of heading one following signs can be used for line breaks

this is page two .

this is not a line break.

8- Links and Hyperlinks

use of [link]

[link]<https://www.youtube.com/watch?v=qJqAXjz-Rh4&list=PL9XvlvVL50HVsu-Ao8NBr0UJSO8O6IBI&index=15&t=52s>

or use <>

<https://www.youtube.com/watch?v=qJqAXjz-Rh4&list=PL9XvlvVL50HVsu-Ao8NBr0UJSO8O6IBI&index=15&t=52s>

for making of hyperlink

[please click here for watcing the vedioes of python ka chilla](#)

use [your name]: link of the site (i.e making of key of that link)

this whole course is [here](#)

lets try an othrer [key]: link ID for giving link.

this course is available [here](#)

in the above mentioned example [] is used for key name and then use the same key name for reffering the link

9- images and Figures with links

please scane the QR_Code or the [click](#) here to join the course.

<id i dont put ! then what will happen lets do it>

QR

here it is only giving the hyper link of that picture.

- use of "!" for showing the image and remaining is the same as key and adress methods.
- ![your desired nemea](name of the picture.png)

*how to comment out in mark down is *

the use of "<>" sign for comment out a statement line in markdown language.

for online picture use follwing methodw

10- Adding a code or code block

- line of code
- code otherwise

use of ` (it is int he starting of 1 , 2, 3, 4, ...) on both side can convert a line into code

```
print("hello")
```

for the block of code use ``` in the start and end of the code block. it will also give the option of coping the code with one click

```
print("welcome")
x = 10
y = 5
z = x-y
print(z)
```

Bolock of code for different languages

syntax for code a single line is

```
print("hassan")
```

and the for block of codes/different languages syntaxes

this will indicate the syntax of python language as given below

```
print("welcome")
x = 10
y = 5
z = x-y
print(z)
```

this will indicate the syntax of R language as given below

```
print("welcome")
x = 10
y = 5
z = x-y
print(z)
```

11- adding tables

for adding tables use | this sign

sr number	age	sex	income	modes	activities
1	78	m	789999	swwiw	89
1	78	m	789999	swwiw	89
1	78	m	789999	swwiw	89

** this is the method for making a table.
